1 Introduction and Overview

This document summarizes the delivery of the **TACTIX k-space tutorial software**. The tutorial provides a web interface using streamlit functionality, which guides the user through different aspects of image reconstruction in magnetic resonance imaging. Included topics cover e.g. coil combination, parallel imaging or partial Fourier algorithms.

2 Release Summary

Software Component	TACTIX k-space tutorial software
Version	https://gitlab.fme.lan/tactix/tactix-tutorials/-/tags/tactix_k-space_tutorial_v1.0 SHA: 0d83719ae7d55479fca8a5def2014f1d3e835741
Embedding Product(s)	Not applicable
Purpose of this Release	Provision of the TACTIX k-space tutorial software under MIT license for research and educational purposes. Not for clinical use.
OS and Compiler Details	OS: Windows 11 Python Version: 3.12
Embedded Libraries	The following libraries are used by the software. Detailed license information is contained in the delivered "third_party_licenses" folder and in the NOTICE file. • streamlit • numpy • matplotlib • IPython • OpenCV • PyWavelets • Pydicom • Scikit-learn • Scikit-image
Functionality	The software provides an interactive approach to teaching image reconstruction algorithms. Therefore, a Python backend is implemented using streamlit which serves the graphical web interface as well as the different reconstruction algorithms. Users can interact with the web frontend and respective algorithms to learn about image reconstruction in a dynamic fashion.
Regulatory Compliance	THIS SOFTWARE IS PROVIDED "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. In particular, Fraunhofer MEVIS does not ensure compliance to medical product regulations for the release.

	TACTIX KSPACE TUTORIAL	Document-ID TACTIX_KSPACE_ TUTORIAL	Last Change by jhu
	Release Letter	V1	Last Change on 2026-08-31 Page 3 / 3

Safety Classification	None
Risk Measures	No risk measures defined.
Known Nonconformities and Restrictions	The software is not qualified for use as a medical product or as part thereof. No bugs or restrictions are known. This software was (and is continuously) developed in the context of an EU-funded project and thus this release reflects the current state of research without having undergone comprehensive validation. We therefore do not guarantee correctness and conformities of any included algorithms. If you notice any incorrectness, bugs or faulty results, you may report those to the project maintainers (contact mail see above).
