1 Introduction and Overview

This document summarizes the delivery of the **TACTIX MRI Basic Tutorial software**. The software provides an educational MRI tutorial application that provides background information to core MRI principles, including Bloch dynamics and gradient effects. It is designed to support training and learning through real-time visualization.

2 Release Summary

Software Component	TACTIX MRI Basic Tutorial
Version	https://gitlab.fme.lan/tactix/tactix-tutorials/-/tags/tactix_mri_basic_tutorial_v1.0 SHA: 929e564e58a98eab318b3d5ef8c535212309d398
Embedding Product(s)	Not applicable
Purpose of this Release	Provision of the TACTIX MRI Basic Tutorial software under MIT license for research and educational purposes. Not for clinical use.
OS and Compiler Details	OS: Windows 11 Python Version: 3.12
Embedded Libraries	The following libraries are used by the software. Detailed license information is contained in the delivered "third_party_licenses" folder and in the NOTICE file. - streamlit - Numpy - Matplotlib - Pyarrow
Functionality	This software is an educational MRI simulation tool that provides interactive visualizations of core magnetic resonance imaging concepts. Through a Streamlit-based interface, information about gradient activity and Bloch dynamics can be gained by the user. The software is supported by an external Bloch simulator software. The application is intended for training and tutorial use to support understanding of MRI fundamentals.
Regulatory Compliance	THIS SOFTWARE IS PROVIDED "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. In particular, Fraunhofer MEVIS does not ensure compliance to medical product regulations for the release.
Safety Classification	None
Risk Measures	No risk measures defined.

	Release Letter	V1	Last Change on 2026-08-31	Page 3 / 3

Known Nonconformities and Restrictions	The software is not qualified for use as a medical product or as part thereof. No bugs or restrictions are known. This software was (and is continuously) developed in the context of an EU-funded project and thus this release reflects the current state of research without having undergone comprehensive validation. We therefore do not guarantee correctness and conformities of any included algorithms. If you notice any incorrectness, bugs or faulty results, you may report those to the project maintainers (contact mail see above).
